ORDER

APPLICATION 22407 PERMIT 15801 LICENSE

ORDER APPROVING A NEW DEVELOPMENT SCHEDULE

WHEREAS:

1. Permit 15801 was issued to Surety Leasing Corporation on February 13, 1969 pursuant to Application 22407.
2. Permit 15801 was subsequently assigned to Lake County Service Area #2.
3. A petition for an extension of time within which to develop the project and apply the water to the proposed use has been filed with the State Water Resources Control Board.
4. The permittee has proceeded with diligence and good cause has been shown for said extension of time.

NOW, THEREFORE, IT IS ORDERED THAT:

1. Condition 8 of the permit be amended to read:

COMPLETE APPLICATION OF THE
WATER TO THE PROPOSED USE
SHALL BE MADE ON OR BEFORE

December 31, 2001

(0000009)

APPLICATION 22407 PERMIT 15801 LICENSE _____

ORDER APPROVING A NEW DEVELOPMENT SCHEDULE,
CHANGE IN POINT OF DIVERSION, AND AMENDING THE PERMIT

WHEREAS:

1. Permit 15801 was issued to Surety Leasing Corporation on February 13, 1969 pursuant to Application 22407.
2. Permit 15801 was subsequently assigned to Lake County Service Area No. 2.
3. A petition for extension of time within which to develop the project and apply the water to the proposed use and a petition to change point of diversion has been filed with the State Water Resources Control Board.
4. The permittee has proceeded with diligence and good cause has been shown for extension of time and for the said change.
5. The Board has determined that the petitioned changes do not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.

NOW, THEREFORE, IT IS ORDERED THAT:

1. A new development schedule is approved as follows:

CONSTRUCTION WORK SHALL BE
COMPLETED ON OR BEFORE

December 31, 1990

COMPLETE APPLICATION OF THE
WATER TO THE PROPOSED USE
SHALL BE MADE ON OR BEFORE

December 31, 2000

2. Paragraph 2 of this permit regarding Points of Diversion and Rediversion shall be as follows:

Point of Diversion and Storage:

On Wolf Creek at Spring Valley Lake: North 38°38'34" West 8,577 feet from SE corner of Section 13, T14N, R7W, MDB&M, being within NE¼ of SE¼ of Section 11, T14N, R7W, MDB&M and also described as California Coordinates, Zone 2, N 512,500 and E 1,832,000.

Point of Diversion for Direct Diversion:

On Wolf Creek: South 525 feet and East 1,725 feet from NW corner of Section 11, T14N, R7W, MDB&M, being within NE¼ of NW¼ of said Section 11, and also as California Coordinates, Zone 2, N 516,400 and E 1,828,800.

Point of Diversion and Rediversion:

On North Fork Cache Creek: South 81°02'34" East, 2,470.04 feet from NW corner of Section 13, T14N, R7W, MDB&M, being within NE¼ of NW¼ of said Section 13, and also described as California Coordinates, Zone 2, N 510,000 and E 1,834,000.

3. Paragraph 10 of this permit be amended as follows:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust. (0000012)

4. Paragraph 18 is added to this permit and reading as follows:

For the protection of the fishery, the permittee shall during the year bypass a minimum of 10 cfs or the total streamflow shall be bypassed, whichever is less. (0140060)

5. Paragraph 19 is added to this permit and reads as follows:

No water shall be diverted under this permit until permittee has installed a device, satisfactory to the State Water Resources Control Board, which is capable of measuring the flow required by the conditions of this permit. Said measuring device shall be properly maintained. (0060062)

6. Paragraph 20 is added to this permit reads as follows:

No water may be diverted under this permit during the months of July, August and September. Permittee shall provide the Board with documentation of the water supply contract with Yolo County Flood Control and Water Conservation District for diversion of release from Indian Valley Reservoir during the unpermitted season. (0250900)

7. Paragraph 21 is added to this permit and reads as follows:

Permittee shall consult with the Division of Water Rights and develop and implement a water conservation plan or actions. The proposed plan or actions shall be presented to the State Water Resources Control Board for approval within one year from the date of this order or such further time as may, for good cause shown, be allowed by the Board. A progress report on the development of a water conservation program may be required by the Board at any time within this period.

All cost-effective measures identified in the water conservation program shall be implemented in accordance with the schedule for implementation found therein.

STATE OF CALIFORNIA
THE RESOURCES AGENCY
STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

ORDER

APPLICATION 22407

PERMIT 15801

LICENSE _____

ORDER APPROVING A NEW DEVELOPMENT SCHEDULE,
AND AMENDING PERMIT

WHEREAS:

1. A petition for extension of time within which to develop the project and apply the water to the proposed use, has been filed with the State Water Resources Control Board.
2. It appears that the permittee has proceeded with diligence and that good cause has been shown for extension of time.
3. The Board has determined that this extension of time will not operate to the injury of any other legal user of water.

NOW, THEREFORE, IT IS ORDERED THAT:

1. A new development schedule is approved as follows:

CONSTRUCTION WORK SHALL BE COMPLETED ON OR BEFORE DECEMBER 1, 1981.
APPLICATION OF THE WATER TO THE PROPOSED USE SHALL BE COMPLETED ON
OR BEFORE DECEMBER 1, 1982.

2. The total annual diversion and use allowed under said Permit 15801 be limited to 561 acre-feet.
3. Paragraph 10 of the permit be amended to read as follows:

Pursuant to California Water Code Section 100, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

This continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to minimizing waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement such programs as (1) reusing or reclaiming the water allocated; (2) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (3) suppressing evaporation losses from water surfaces; (4) controlling phreatophytic

growth; and (5) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

4. Paragraph 8 be added to the permit as follows:

The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges. 5. The water appropriated shall be limited to the quantity which can be beneficially used, and shall not exceed 1 cubic foot per second by direct diversion to be diverted from about October 1 of each year to about June 1 of the succeeding year and 280 acre-feet per annum by storage to be collected from about November 1 of each year to about May 1 of the succeeding year.

This permit does not authorize collection of water to storage outside of the specified season to offset evaporation and seepage losses or for any other purpose.

(000 0005)

6. The maximum quantity herein stated may be reduced in the license if investigation warrants. (000 0006)

~~Actual construction work shall begin on or before ----- and shall~~
~~thereafter be prosecuted with reasonable diligence, and if not so commenced and prosecuted this permit may be~~
~~revoked.---~~

7. Said construction work shall be completed on or before December 1, 1971. (000 0008)

8. Complete application of the water to the proposed use shall be made on or before December 1, 1972. (000 0009)

9. Progress reports shall be filed promptly by permittee on forms which will be provided annually by the State Water Resources Control Board until license is issued. (000 0010)

10. All rights and privileges under this permit including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water and to carry out legally established water quality objectives. (000 0012) amended 11-14-88

11. Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit. (000 0011)

12. Upon a judicial determination that the place of use under this permit or a portion thereof is entitled to the use of water by riparian and/or prior appropriative right, the right so determined and the right acquired under this permit for direct diversion of water shall not result in a combined right to the use of water in excess of that which could be claimed under the largest of the rights. (000 0021)

13. Water entering the reservoir or collected in the reservoir during and after the current storage season shall be released into the downstream channel to the extent necessary to satisfy downstream prior rights. (0160800)

14. Permittee shall, when required by the State Water Resources Control Board, install and maintain an outlet pipe of adequate capacity in his dam as near as practicable to the bottom of the natural stream channel or provide other means satisfactory to the State Water Resources Control Board to comply with the preceding paragraph. (0050044)

15. In accordance with the requirements of Water Code Section 1393, permittee shall clear the site of the reservoir of all structures, trees, and other vegetation which would interfere with the use of the reservoir for water storage and recreational purposes. (0120050)

16. If the dam is of such size as to be within jurisdiction of the Department of Water Resources as to safety, storage of water shall not be commenced until the Department has approved plans and specifications. (0360048)

17. Permittee shall restrict its diversion under this permit to times when water flows past Moore Dam, the lowermost point of diversion of Yolo County Flood Control and Water Conservation District. (0360900)

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

[illegible]

• \mathbb{R}^n is not a vector space over \mathbb{C} because $i \cdot 1 = i \notin \mathbb{R}$ (multiplication of i by a scalar in \mathbb{R})

[illegible]

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Once a plan of action has been developed, the next step is to implement the plan. This involves carrying out the steps that have been identified in the plan and monitoring the progress of the implementation. Finally, the last step in the process is to evaluate the results of the implementation. This involves determining whether the problem has been solved and whether the resources have been used effectively.
